

MARKET & COMPETITIVE RESEARCH · SAMPLE DELIVERABLE

Cold-Pressed Juice — Metro Market Scan

A sample of the format I deliver: the market read, the competitive set, the gaps, and a clear recommendation — sourced and decision-ready. (Illustrative data for a fictional client evaluating a new location.)

THE MARKET

- Metro category ~\$42M and growing ~8%/yr; premium and functional lines growing fastest.
- Demand concentrated in three walkable, high-income neighborhoods; weekday morning + post-gym peaks.
- Delivery/subscription now ~30% of category revenue — table stakes, not a differentiator.

COMPETITIVE SET

Competitor	Position	Price	Strength	Gap we can exploit
GreenPress	Premium leader	\$\$\$	Brand, 4 locations	Weak functional/wellness line
DailyCold	Value	\$	Price, delivery	Thin in-store experience
Roots Bar	Cafe hybrid	\$\$	Foot traffic, food	Juice is secondary, inconsistent
Local grocers	Convenience	\$\$	Ubiquity	Not fresh-pressed; no expertise

THE GAP & RECOMMENDATION

- **White space:** a functional, wellness-forward juice bar in the Riverside district — no premium player there yet.
- **Wedge:** lead with functional blends (immunity, recovery) the value players don't offer and the premium leader underweights.
- **Go/no-go:** proceed with Riverside; revisit downtown only if a co-located food partner signs.

In a live engagement, every figure is sourced (industry reports, foot-traffic data, field visits) and each recommendation ties to a specific, testable next step.
